

Reasons to be a safe rider

1. Cars are bigger.
2. You cannot stop trains, buses and cars with your hand. You are not Supercyclist.
3. Five minutes before the end of one ride, you will be planning your next ride.
4. If an injury sidelines you, recuperation is a drag.
5. Your kids/grandkids deserve more time with you.
6. As long as the number of ride starts equals the number of ride stops and you and your bike are in good condition, it was a good ride.
